

It is clear that CT voters have spoken and want early voting in their state. Connecticut cannot continue to lag behind on voting rights. We must provide options for elderly, working families, and the disabled. In addition, early voting needs to address the need for early morning, evenings, and multiple weekends so that all citizens can vote. It is critical that the budget addresses funds to pay additional election officials, educate with voters about the new access and run the new operations smoothly and securely. We need fast action and concrete steps as soon as possible so we are prepared for 2023 as well as the Federal elections in 2024.

Respectfully,  
Judy Stone
